Coffee Shop sales Analysis

The main objective of this project is to analyze retail sales data to gain actionable insights that will enhance the performance of the Coffee Shop.

Tool Used:

- Excel

Coffee Shop Sales Analysis: Problem Statements and Insights

1. How do sales vary by day of the week and hour of the day?

- **Hourly Variation**: A line chart illustrates that sales peak between **8 AM to 10 AM**, highlighting busy morning hours as the top-performing time slot.
- **Daily Variation**: A bar chart shows that **Monday, Thursday, and Friday** experience the highest sales, suggesting these are the busiest days for the coffee shop.

2. Are there any peak times for sales activity?

- Peak sales activity occurs between **8 AM and 10 AM**, as clearly shown by the line chart.

3. What is the total sales revenue for each month?

- A bar chart is used to represent monthly sales revenue, making it easy to visualize trends:
    - June recorded the highest sales at $1,66,485.88, followed by May with $1,56,727.15.
    - February had the lowest sales at $76,145.19, while January followed with $81,677.74.
    - Sales show a steady upward trend from February to June.

4. How do sales vary across different store locations?

- A column chart compares store performance:
    - **Hell's Kitchen** leads in sales with **$2,36,511.17**.

- **Astoria** follows with **$2,32,243.91**.
- **Lower Manhattan** has the lowest sales at **$2,30,057.25**.

5. What is the average price/order per person?

- The calculated metric for **average order per person** is **$1.44**.

6. Which products are the best-selling in terms of revenue?

- The top 5 best-selling products based on revenue are:
  - **Barista Espresso**: $91,406.20
  - **Brewed Black Tea**: $77,081.95
  - **Brewed Chai Tea**: $70,034.60
  - **Gourmet Brewed Coffee**: $72,416.00
  - **Hot Chocolate**: $47,932.00

7. How do sales vary by product category and type?

- Category-Wise Sales Distribution:
  - **Coffee** contributes the most with **39%** of total sales.
  - **Flavours** are the second-largest contributor, accounting for **28%** of the total sales.
  - **Bakery items** follow with **12%**, while Branded products contribute **10%**.
  - **Coffee beans** make up **6%**, and Drinking Chocolate and Loose Tea each account for **1%** or less.

Order Size Distribution:

- As per the size distribution chart, **Large (31%)**, **Regular (30%)**, and **Undefined (30%)** orders have nearly equal shares.
